

PIP65: Watermill House (2)

Granite house with watermill on 1 hectare

This house is very interesting because it has a watermill. In the past the miller lived upstairs. After renovation it could be a beautiful house with a small museum room, or - it depends on future owner's wishes - the watermill can be restored and become functional again, perhaps providing small-scale hydro-electricity for the property.

The property has wonderful views to Serra da Estrela, and there is a small stream passing close the house.

10.000m² (1 hectare) agricultural land.

200m from a beautiful rustic village with a small river passing through. About 7km from the nearest city (Fornos de Algodres). The access is by way of a dirty track. 100m from the main road.

Electricity: 200m

Water: The water is supplied by company (not connected yet).

Price: 65,000 euros
